## AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

## LISTING OF CLAIMS:

- 1. (currently amended): A compression molded product of quick-dissolving chlorinated isocyanuric acid, comprising:
- (a) trichloroisocyanuric acid, contained in an amount of from 40 to 50% by weight,
- (b) sodium dichloroisocyanurate anhydrous salt, contained in an amount of from 40 to 50% by weight,
- (c) magnesium sulfate and/or aluminum sulfate, contained in an amount of from 1 to 5% by weight, and
  - (d) calcium carbonate contained in an amount of from 1 to 10% by weight, each based on all the components.
  - 2. (canceled).
- 3. (original): The compression molding product according to claim 1, wherein the component (a) has a particle size of 400 µm or less and contains particles having a particle size of 75 µm or less in an amount of from 70 to 90% by weight based on all the particles of the component (a), and

Appln. No.: 10/657,125

Amendment under 37 C.F.R. § 1.111

the component (b) has a particle size of  $600 \mu m$  or less and contains particles having a particle size of from 150 to 450 µm in an amount of 90% by weight or more based all the particles of the component (b).

- 4. (original): The compression molded product according to claim 1, wherein the component (d) has a particle size of 15  $\mu m$  or less and has an average particle size of 3  $\mu m$  or less.
- 5. (original): A process for producing the compression molded product according to claim 1, which comprises molding under compression a composition comprising:
  - (a) trichloroisocyanuric acid,
  - (b) sodium dichloroisocyanurate anhydrous salt,
  - (c) magnesium sulfate and/or aluminum sulfate, and
  - (d) calcium carbonate.
